NovaTone®

The Professional Solution to Patient Relaxation.

AEI's NovaTone Music Service offers a unique mix of the best music and entertainment selections available. Each program is sequenced to attract and hold a patient's attention. This uninterrupted flow of music and entertainment distracts and soothes the patient, while the dentist concentrates on his work.

The central music delivery system is a heavy-duty commercial tape playback unit designed for continuous operation.

NovaTone — Because patient comfort is important to the success of your practice.

NovaTone — Nothing works as effectively.
NovaTone — Nothing sounds as great.

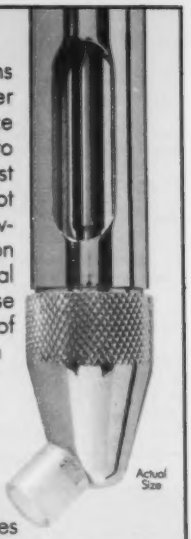
HYGENIC

Most patients fear oral injections by needle more than any other aspect of dental treatment. Since most of this apprehension is due to psychological factors, even the finest needle and syringe technique cannot eliminate it. With the MadaJet however, a fine jet stream of medication penetrates directly through the oral mucosa. **There is no needle.** The use of this instrument can relieve much of your patient's fears (especially in children) and significantly reduce physiological pain as well.

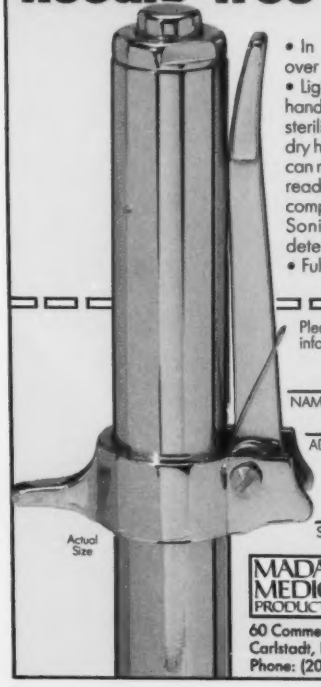


Without need for supplemental anesthesia using needle and syringe, the MadaJet usually provides profound anesthesia for: • Extractions or preparation of deciduous teeth. • Mental and naso-palatine blocks. • Adult anterior preparation (55%). • Curettage and scaling. • Seating crowns. • Pointing abscesses. • Minor gingivectomies.

Because patients hate needles . . .

MadaJet

needle-free injector.



• In successful clinical use for over a dozen years. • Quiet. • Lightweight, (10 oz.) fits your hand like a syringe. • Common sterilization methods, (except dry heat) may be used. • American made, parts and service are readily available. • Supplied complete with holder, Mada-Sonic Solution (germicidal/detergent) and custom case. • Full year warranty.

Please send me more information on the **MadaJet.** DE
